TO KEEP THE MOTHS OUT.

Is what every housewife tries to do when putting away Woollen Cloths, Blankets, Furs, &c. for the Summer, and until recently Camphor was considered the best preservative, but a more effectual and cheaper agent is NAPHTHALIN. A few placed in between the folds of Woollens when packed away will be found to be a perfect preservative against moths and grubs of all kinds.

If Books are kept in closed cases with some pieces of Naphtalin scattered about, the bindings will be effectively preserved against cockroaches.
